The Future of Operating Rooms, Interventional Radiology, and Clean Pharmacy

In the past five years alone, mfPHD has completed over 200 projects in the United States from single room renovations to large tower expansions.

We understand and protect your world!

FORTRESS™ Stainless Steel Wall System

#1 in the United States

From surgery to clean room pharmacies, and sterile processing to critical care, the mfPHD FORTRESS™ stainless steel wall system safeguards the most challenging environments in healthcare.

mfPHD FORTRESS™ helps to maintain revenue stream, guards against the consequences of surface contaminants, and mitigates the risk of future changes in technology and care with the most flexible wall panel system available.

- Superior infection control resulting in reduced HAIs and SSIs
- Unmatched flexibility to safeguard against future changes
- Exceptional durability
- Reduced life-cycle costs
- Expedited construction
- Expedited retrofitting of active spaces
- Significant ICRA Containment
- Durable and Easy to Clean
- USP 800 Compliant

The mfPHD FORTRESS™ wall system was instrumental in reducing the total downtime of a Pharmacy Carousel to just 15 days.

*Customized to the specific needs of an academic medical center, the wall system was installed in **three rooms within three days.***
